

THE
Miracle of Organo
BINDER

WHY SHOULD I DRINK THIS COFFEE EXCLUSIVELY FOR 30 DAYS OR LONGER TO GET THE FULL *Organo Experience*?

That's a great question, and one we are asked very often. Why can't I consume other coffees along with this? Upon our research here is what we found.

Ganoderma is an adaptogen and begins working within the body on different systems based on need. Someone with a certain need may notice something immediately while someone else may take longer. Once the presence of Ganoderma is more built up in your body, it can begin to be more effective (it's all based on the person). By consuming other coffees, you are directly counteracting what Ganoderma is doing, and slowing down the process. Other coffee makes your body more acidic, among many other things. **Consuming this coffee exclusively will begin to alkalize your body, and build up the presence of Ganoderma in your body so you can begin to experience the full benefits. This may take up to 30 days or longer!** For some people it's much different.

Here's the story of a person who was extremely healthy, and didn't notice anything for several weeks but one day, realized the amazing power of what this Ganoderma was doing in his body.

"A turning point for me in Organo came after a very rough trip home from the West Coast my flight was delayed for over four hours leaving California and with the time change I took a very bumpy ride home, and was not able to get any sleep on the plane. I arrived home at about 5:30 AM to see my first patient at 7 AM that day I drink a cup of coffee every waking hour (12 cups) to keep up with my day and amazingly I did not get a headache I did not get a gut ache and I was able to sleep like a baby that next night.

With my typical Starbucks coffee in the past, I would've have had a gut ache, a headache, jitters and insomnia after 4 cups. That's why for the last several years now I've only consumed Organo."

- R.R., Houston TX

WHAT ABOUT ADDICTION?

We totally understand what you may be thinking. What could Ganoderma do for me if I have an addiction, like smoking or drinking? We had the exact same question, but knew Ganoderma was beneficial for the brain, so we figured we would give it a try. Upon further research, here is what we found.

Ganoderma is powerful for helping the brain receive what it needs. This helps reduce the craving for things such as cigarettes, alcohol, and similar substances. People find they have a clearer mind, a happier mood, better sleep, and are more calm. They find that they don't have a need for a substance anymore, because they are feeling so phenomenal without it! Here is a story of a person who stopped drinking alcohol while consuming Organo products.

'After my mom died ten years ago my dad began drinking much more than usual. He was drinking at least a liter a day, probably much more. He would get very upset and scream and moan for wine if he ran out of it. Since we have been giving him spores he has pretty much quit drinking. Only when we go out to eat does he drink and then just one glass of wine with dinner. Also, he seems to be happier. My dad just turned 88 in April.'

- S.L.

WHAT ABOUT ALLERGIES?

WHAT ABOUT NUT ALLERGIES, OR ANY OTHER ALLERGIES I MAY HAVE?

What a great question, and one many people are curious about. We also were curious about this and decided to do some research. Here is what we found.

People with regular allergies seem to notice less sensitivity to foods, and environmental particles, than they would have been in the past. This is because **Ganoderma is known to calm an overactive immune system (which is all an allergy is). It is also proven to dilate the airways more effectively than prescription inhalers.** Ganoderma so reduces inflammation which is important for the most severe allergic reactions, that may even become dangerous. We don't want to say Ganoderma could save your life in a life threatening situation, but it could help!

In fact, here's 2 stories about allergies. 1 about regular seasonal allergies and 1 about a life threatening nut allergy that was brought under control by Ganoderma.

'I have a severe allergy to most tree nuts to the point where my throat and mouth swell up, my entire body gets a rash and becomes itchy. In the past when I've accidentally consumed tree nuts the only thing that would alleviate the symptoms would be to stab myself with an EpiPen or force myself to throw up. One day I was on a road trip and had a cookie with nuts in it. I did not have my EpiPen with me. We ended up pulling over to a gas station I made myself a cup of Organo black coffee and a few minutes later the symptoms started to disappear and about an hour later they were almost completely gone. This was the first time I did not need to use an EpiPen or make myself throw up after having an allergic reaction to tree nuts and I believe through God and the Miracle of Ganoderma that coffee may have saved my life.'

- G.A.

'My allergies are seasonal, so when allergy season came around, I was already drinking the coffee for about 6 months. I added the spores, and within a day, noticed a huge difference. After about 4 days, my allergies were gone. That was 3 years ago and now after drinking 2 cups per day, I have completely eliminated my allergies.'

- K.R.

COULD GANODERMA BE GOOD FOR ATHLETES?

We had the same question, how could Ganoderma be beneficial for athletes? We knew Ganoderma could benefit many other things, and decided to give it a try! Here is what we found upon further research.

Ganoderma is known to increase focus, blood flow, oxygenation, and nitric oxide, and be highly beneficial for athletes. When people use Ganoderma they feel a natural boost with no crash. They also feel like they have a second wind and can train longer with faster recovery. In fact, here are just a couple of people using Ganoderma and sharing their story after working out.

'5 time Guinness World record holder Stevie McGeown (not pictured) ran 100 marathons in 100 days and 60 ultra marathons in 60 days. He consumed Organo products throughout the races, and got faster with every race. His body was able to recover because of the decrease in inflammation, alkalization and oxygenation Ganoderma brought to his body.'

'I get up early in the morning, get my cup of coffee, in this case, healthy coffee. It's Organo Gold with Ganoderma in it. It's good stuff. It keeps me focused and alert for the day. I work alot, sometimes 60-65 hours a week, I train and I've got a family so it's a bit crazy but this stuff keeps me focused and it's great for you too. I believe these products have helped me with my workouts my recovery and my health'.

- Ulisses

CAN ORGANO POSSIBLY BENEFIT PEOPLE WITH **AUTISM?**

We know exactly how you may be feeling. Why would this product benefit Autism? Why introduce something new to a person with autism if you're not sure how they will respond? We felt the exact same way, but upon further research here is what we found.

Ganoderma does wonders for the autistic mind. It brings oxygenation to the brain, decreases inflammation, and has natural properties that help promote positive neurochemistry. In addition to this, we have a few people who have autism, and have consumed our products. Here is what they experienced-

'The Organo Gold Hot Chocolate helped my son so much that he made a statement that he felt too focused and it felt weird .He's newly diagnosed with the autism on the spectrum level. It helps him sleep and I noticed when he sleeps good his behaviors are a lot better.

He's has also started play behavioral therapy and the therapist says he's doing great they have no behaviors with him.

He hates getting pictures taken I do have a few random ones on my Facebook like rowing the boat he wouldn't have been able to do that before he would have been bored to distracted and easily frustrated if he couldn't figure it out.'

- A.D.C.

COULD THIS BENEFIT PEOPLE WITH BLOOD SUGAR CHALLENGES?

IS IT OKAY TO TAKE THIS IF I HAVE DIABETES?

We totally understand how you may be feeling. With something as serious as blood sugar challenges, it helps to be mindful with everything you put in your body. We felt the exact same way you may be feeling right now. But we did some further research and here is what we found.

Ganoderma is known to balance blood sugar. In fact, there are several stories of people who have consumed Ganoderma with diabetes, here is one story of how it worked for them.

'After one month and two weeks my dad has been drinking King of coffee and Reishi Spores everyday. I started to see a lot of things change in his health. My dad had high blood pressure and diabetes. He has to check his sugar and blood pressure every morning. After one month and two weeks later, he has no need to do any of that any more.

- 1. His energy is up.*
- 2. Overall facial colour changed (more oxygen/blood flow)*
- 3. His stress is down.*
- 4. Sleep is a lot better (did not hear his footsteps every night at 2 to 3am)*

When I ask my dad how he feels overall after drinking King of coffee and taking Spores everyday, his answer was 'I feel a lot better not tired all the time , I sleep through the night till morning; if burglar breaks into my house I would not hear anything.'

- S.L.L.

WHAT ABOUT BOWEL CHALLENGES?

WHAT IF I ONLY USE THE BATHROOM ONCE PER WEEK? WHAT IF IT IS PAINFUL FOR ME TO USE THE BATHROOM? MAY THESE PRODUCTS BE OKAY TO TAKE IF THIS IS THE CASE FOR ME?

This is an awesome question, and not one many people talk about too openly. However we know many people deal with this issue and we decided to do some research. Here is what we found.

Ganoderma is incredible for detoxifying the system, as well as bringing the body the proper nutrients it needs to function the way it was designed to. In addition to this, it is an amazing detoxifier. Some people use the bathroom less often than they should. The ideal amount is 1 or more times per day! So if all of that is inside of you instead of out like it's supposed to be, you can imagine the discomfort that make cause you or someone you know. Many people report that after consuming Ganoderma that they use the bathroom and feel better than they've felt in a long time! Some people have pain using the bathroom. This can help with that too.

In fact, here is a story of a person who had bowel challenges and here is what they experienced.

'I was not given the benefits of this product and passed it off as just another coffee. If I had only looked into this further and maybe been given some better education on this incredible mushroom things would be different but timing they say has a way of showing it self at the right time and place in your life and it has been blessing now in so many ways as it's brought relief of pain, better health & wellbeing to my self, my family, friends & my clients.

I have suffered with IBS for years and have never been a restful sleeper but since drinking Organo products I have finally overcome these issues and can't believe how good it feels to not have stomach issues. This is giving our two entrepreneur household "my husband and I" the potential for a much better living and being able to do it together. We love it!!!'

- Esthetician, Dallas

WHAT ABOUT THE CAFFEINE? I NEED DECAF

Organo coffee is great for people who usually need decaf, because it has been reported on many occasions that Ganoderma may alter the way your body metabolizes caffeine. **In our experience, 9/10 people who request decaf do just fine with our products.** Organo coffee is different to regular coffee because it contains Ganoderma, which is renowned in the world of natural medicine to relax the brain and heart, giving you a smooth focused energy with no reported crash, and will not over excite the body in a negative way. *If for some reason you still have challenges, try taking 3 spores with your coffee for 1 week - 1 month and the symptoms should subside within that period of time.*

'Personally, I am on BP meds & my feelings are that the benefits of Ganoderma far outweigh the caffeine. For me, there are no effects with Organo coffee like there are with other coffees that are caffeine laden but nothing healthy to counterbalance. I have never experienced any side effects with OG as is possible with regular coffee: like jittery-ness, rapid heartbeat, shakey inside, etc'.

- T.K.

SHOULD PEOPLE WHO ARE **CANCER PATIENTS** OR ARE ON CHEMO CONSUME OG PRODUCTS?

Your body is your body, so the choice is yours. However, people who consume Ganoderma usually experience less of the harsh effects of chemotherapy, as well as increased appetite, better oxygenation, less mental fog, less fatigue/better energy, less nausea, better alkalinity in the body. *Ganoderma helps provide nutrients in the body needed to support what the chemo is doing for you.*

In fact, here's a story of someone who overcame the negative side effects of Cancer from consuming our products.

'I have with a patient who has been diagnosed with "inoperable pancreatic cancer" by the Mayo clinic (whom we live 2 miles away from.) She is doing many positive things but we saw the most success when she introduced 2 King coffee and 1 Hot choc a day. She is starting the spores tomorrow and will have labs drawn again at the end of March. Her cancer markers were above 500 when I first saw her for care. Recently they were 77 (normal is 35!) She is flourishing with energy, strength, color, hair growth and a healthy digestive system!'

- Doctor, Minnesota

WHAT ABOUT THE CERTIFICATIONS?

This is a great question, and one that our very diligent health minded people ask often, and believe us, we had the EXACT same questions. Does Organo have quality certifications and what are some of them? We looked into this further and here is what we found.

Organo has more quality certifications on their products than the largest privately own nutraceutical company on the planet. We are certified in 30+ countries with the highest quality certifications possible in those countries. Not to mention our company is located in Canada, which is one of the strictest countries in the world on health products. This fact speaks volumes to the lengths Organo has gone to guarantee the best of the best in our products. Organo Products also have a natural product number in Canada, which requires very stringent markers in order to be attained. This assessment is given by Health Canada, and notes that the product is deemed, safe, effective, and of high quality. Keep in mind also that none of these certifications can be bought, they must be earned. Each certification requires review by each certification agency, and passing all of the tests and standards they measure on products they certify. **Some of the more well known certifications are USDA certified organic, Kosher, Halal, GMP, and Eco-Cert just to name a few.** There are so many more, but please understand in each of the countries that we are in, we are certified to the highest degree.

In fact, here's a story of someone who was researching the products, and based on the certifications alone decided to start consuming them.

'I was very skeptical when I heard about the concept of a healthy coffee. Considering the fact that I treat many high end athletes, and many critically-ill patients, I decided to do full due diligence and extensive research before even considering recommending any of these products to the patients that trust me to help them with their health. After realizing that the product had more certifications than one of the largest privately owned professional nutraceutical companies on the planet that I had been lecturing for for the last 2 decades, I came to the conclusion that these products had to be the real deal. In consuming the products for the last 6 years and sharing them with my patient base, the quality and effectiveness of the product surpasses any single product I've ever used.'

- Doctor, USA

SHOULD I GIVE ORGANO TO MY CHILDREN?

Can I give this to my kids you ask? That's a great question and we wondered the same thing. Many of us OG parents came to the same conclusion that if it's great for adults, it makes sense that it would also be great for kids, so we put it to the test and here are some of the results...

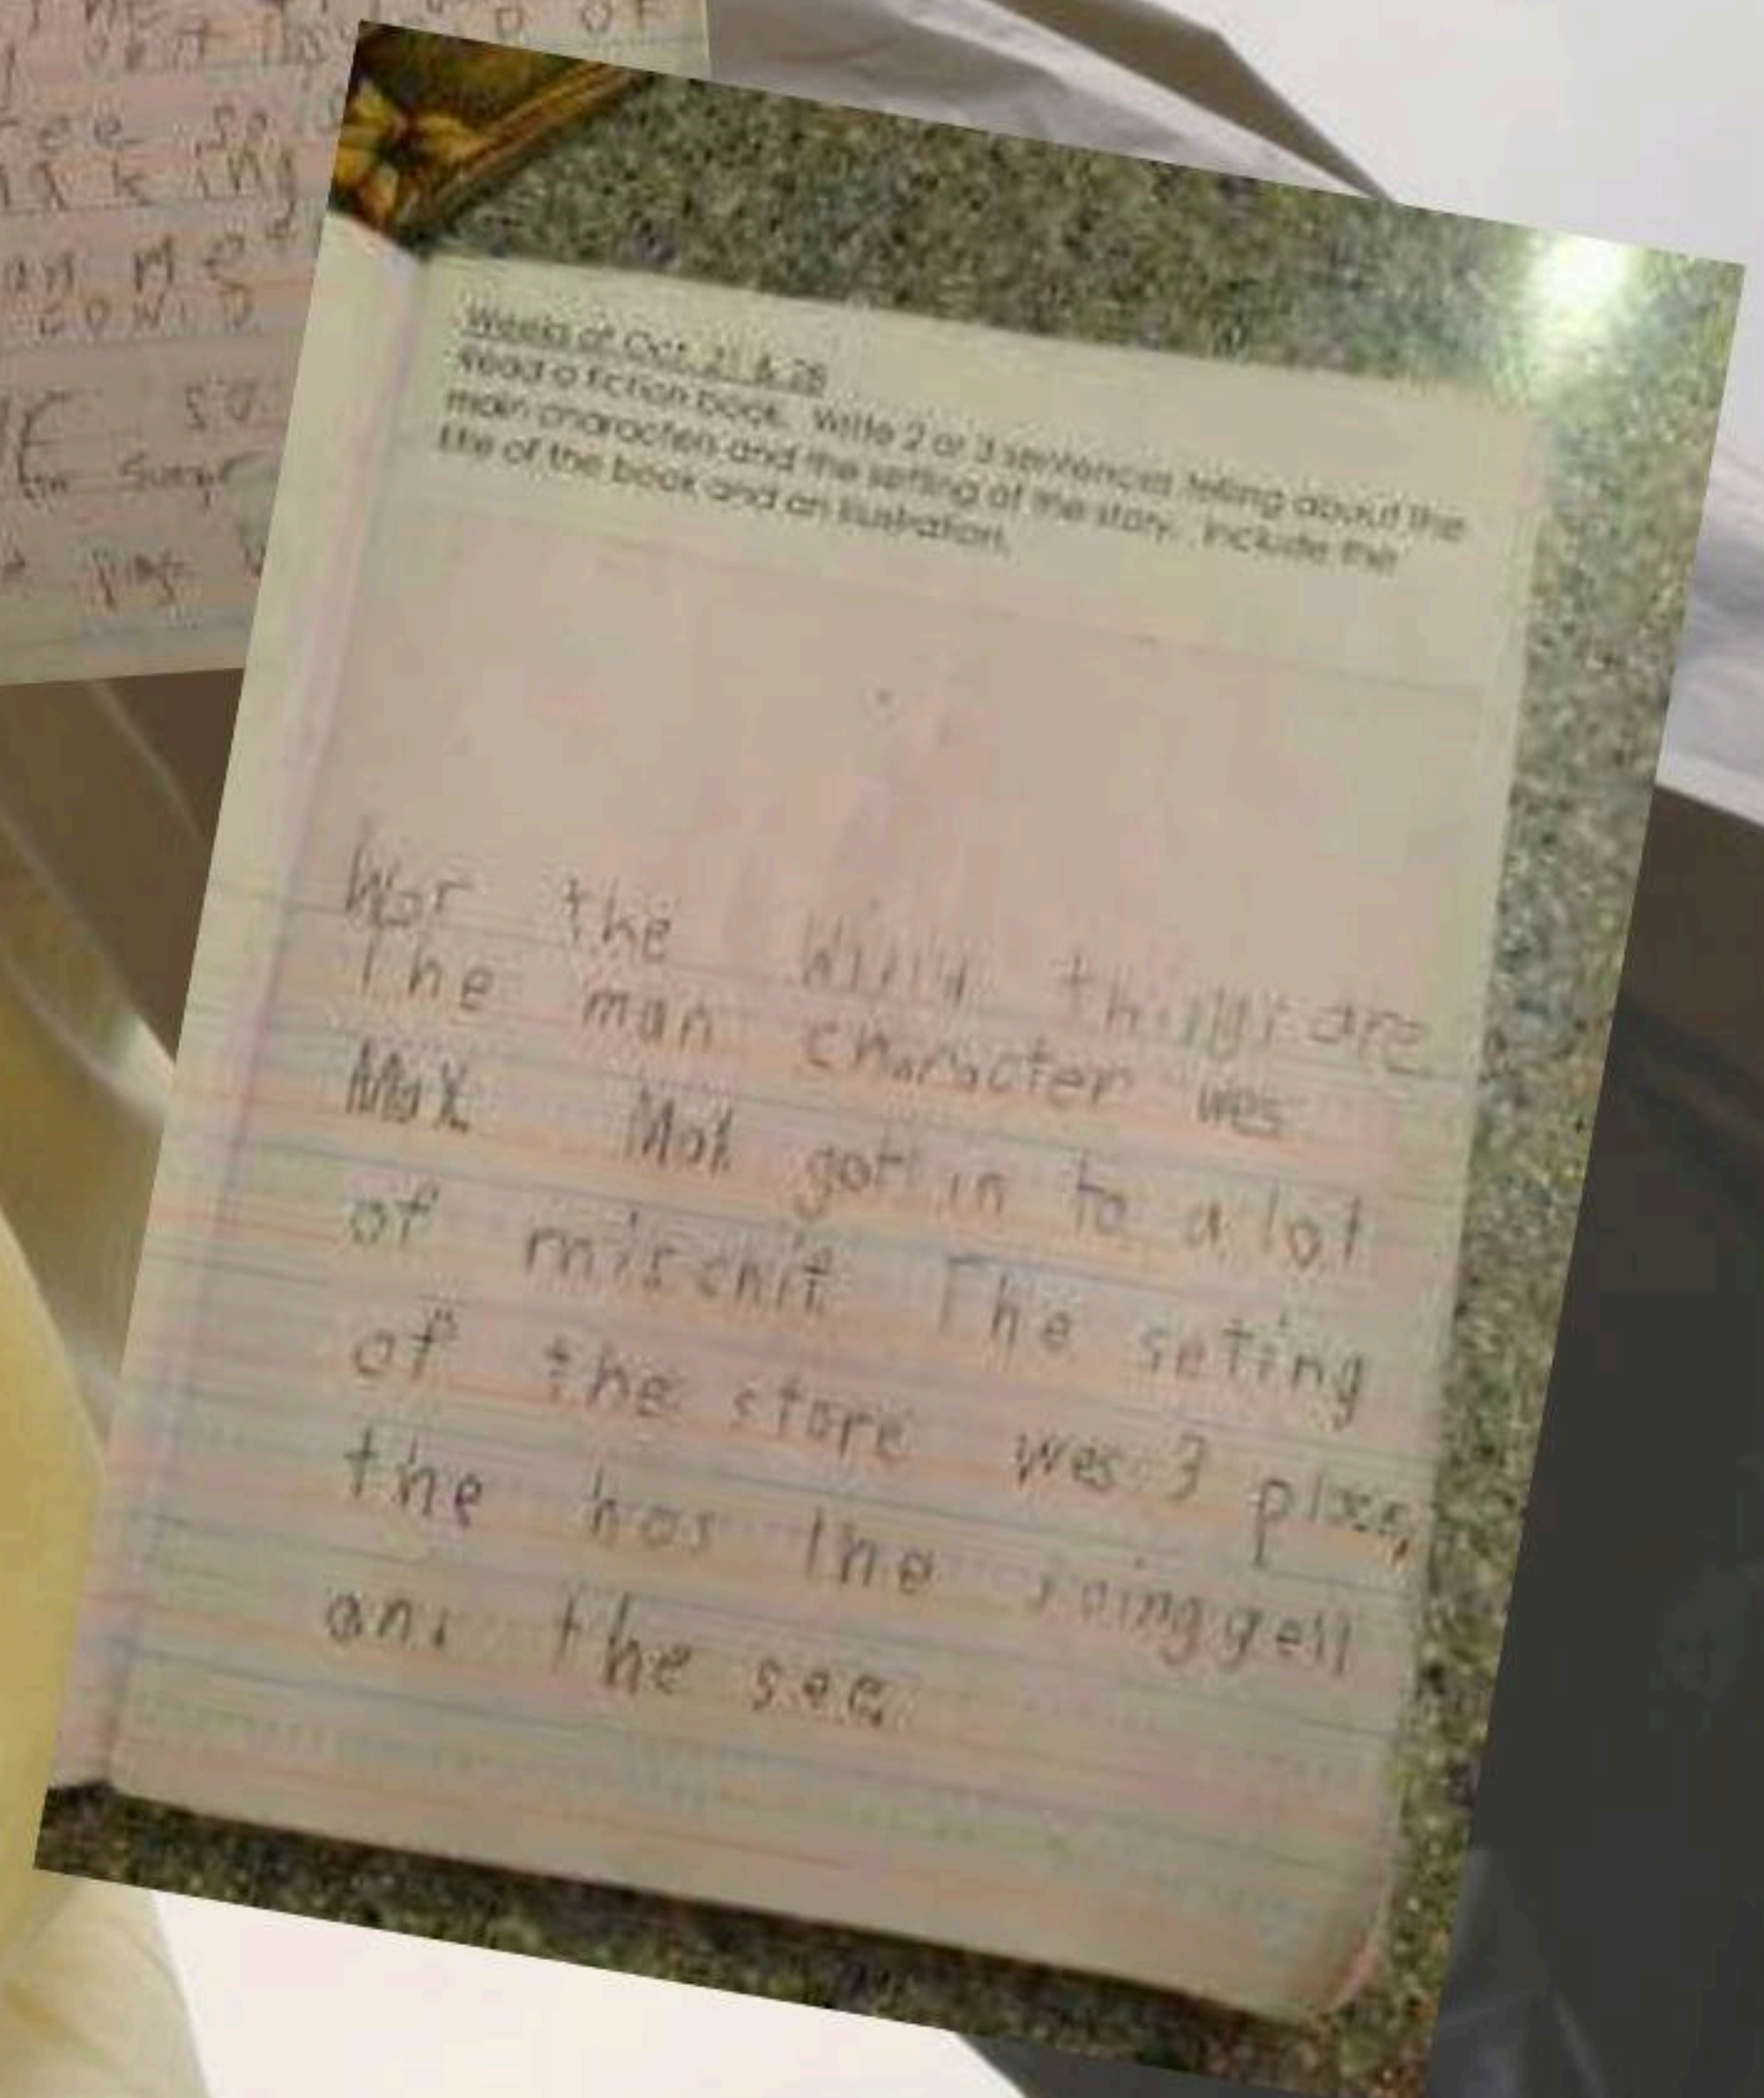

Children do amazing with Ganoderma! It brings oxygen to their brain, which usually improves their behavior and grades in school, supports their immune system and nourishes their body. We haven't seen any negative effects from children consuming Ganoderma. Here is a testimonial from a child who was having challenges in school and here's what he experienced after taking Organo products:

CALEB'S TESTIMONIAL:

- S.E.C.

'So I have to share this about our dear 7 year old son, Caleb. He is ADHD (not officially diagnosed) at worst, extremely (and I mean extremely) 'active' and unfocused at best. He would do so-so while doing school work, but would get frustrated almost immediately if he wrote something incorrectly, not perfect-according-to-his standards, or couldn't 'do' a math problem. In terms of his writing, he would forget to space his words, making it look like mumbo-jumbo much of the time. We certainly control his diet, have him in therapy as a support and have him on a regimen of supplementation. The ONLY thing we changed recently was we added OG Mycelium and the Ganoderma--1 cap each twice daily.

The first picture is a picture of his writing the week before we started that. It's a pretty accurate representation of what his writing would look like when he would write on his own (with no reminders from us to space his words, watch his form, etc.). The second picture is his writing just after 1 WEEK on the Mycelium and Ganoderma--with NO help from us (except how to spell 'character.' And it was the same this week with his writing too. I had goosebumps. God is certainly great in this, (as He is the creator of gandoderma), but OG is too, of course.

WHAT ABOUT CONCUSSIONS?

What a great question, and one we are asked often. We were curious as well, is this okay to consume if you've had concussions in the past? We decided to do some research on this topic and here is what we found. Ganoderma is a wonderful thing to consume if you've had concussions in the past! **We've seen so many people obtain more clarity, a better mood, less anxiety, better sleep, and overall a better state of well being. This is because Ganoderma controls inflammation by multiple different mechanisms, and dissolves amyloid plaquing/scar tissue in the brain. It also induces brain stem cells which is positive for the brain's healing.**

In fact, here's the story of a young man who had 5 concussions within a very short space of time, and here is his experience using Ganoderma.

'Well I came in with a problem with my head. I had 5 concussions. I've had two this year, this past football season and it's been going on for like 4 or 3 months and I didn't really think there was any help. Then my mum found Dr. Bob. I had a lot of anxiety and depression and headaches and I couldn't think. My memory was like completely gone. I kind of felt hopeless and I came to Dr. Bobs office and he fixed me in like 3 weeks and I almost felt like crying because everything just felt so much better and my brain felt so much clearer. I definitely, definitely recommend it because most doctors don't really give us anything that Dr. Bob has. I just completely recommend it...it's awesome'

- S.T.

WHAT ABOUT DEPRESSION? OR A BAD/SAD MOOD? TROUBLE WITH ANGER OR EVEN ROAD RAGE? ANY ISSUES WITH BRAIN CHEMISTRY, OR A TROUBLING MENTAL/EMOTIONAL STATE AT ALL?

This is an awesome question, and one we have been asked by many before. Not many people want to speak about this, but if Ganoderma could stimulate positive, and more balanced neurochemistry for someone with something like depression, this could possibly be a life changing introduction for them! Upon further research, here is what we found.

Ganoderma is known to create positive, balanced neurochemistry.

Scientifically speaking, Ganoderma helps facilitate a calm, even-keel mental state by picking up a neurotransmitter called GABA. Ganoderma picks up serotonin and dopamine, the 2 primary neurotransmitters of happiness. In addition to this, it also controls the inflammatory process in many different ways.

A brain that is out of balance, depressed or dealing with anger, is an inflamed brain. Ganoderma modulates the inflammatory process by at least 10 different mechanisms, calming you down, bringing you into a happier state, and giving you more control over these challenging mental/emotional states you may find yourself in.

In fact, here's a story of a person who wanted to see how Ganoderma would benefit their mental/emotional state, and here is what they experienced.

'I would like to share my testimonial. OG products have literally changed my life! I used to suffer from severe PMS, Migraines, Foot Pain, Depression, Anxiety, Sleep Apnea just to name a few. I have been on the products for 6 months and now instead of taking Advil, Tylenol, or depression meds, I take 3 Mycelium, 1 Spore and 1-3 cups of coffee or tea per day. This is a much better choice and I feel like a whole new person. I haven't felt this good in years and I truly have been blessed!'

- S.P.

WHAT ABOUT DIGESTIVE CHALLENGES? OR GUT PARASITES?

That's a great question. We had the exact same inquiry and decided to do some research on if this would be okay to consume with stomach challenges, or with parasites and here is what we found.

Ganoderma is very alkaline, and that helps the vast majority of people with gut challenges. It also creates a favorable balance of healthy bugs in your gut, decreasing counterproductive bugs, and increasing productive bugs. It also strengthens the tissue in your gut, making it an unfavorable place for parasites to live, and making it more favorable for good digestion to take place. It can promote a better feeling in the gut by these, and many other mechanisms. *Try it, and see what it does for you!* Also, **people with acid reflux notice that this coffee doesn't upset them in the same way.**

Here is a story of somebody with gut challenges using Ganoderma, and here is what they found.

'I personally had a shoulder injury that no one could really fix. I also had digestive issues in undergrad, got desperate and went and saw a gastroenterologist. He told me my symptoms were so intermittent he didn't know what he could do. I remember sitting in his office crying because he had no idea what was wrong with me and I felt hopeless. We scheduled a colonoscopy and I took home all the crap to take for it. I decided it wasn't worth my time or money to "possibly" find something, so I just lived with the problem. I made a few diet changes that helped my GI issue. After I started drinking the coffee every day and had NEVER felt better. My digestive issues and my shoulder problems don't exist anymore. My attitude, energy, and focus are the best it has ever been as well!'

- C.B.

WHAT ABOUT MY EARS?

What a great question, and quite an important one to ask! We were curious about the same thing, what is known about Ganoderma and how it functions with ears and hearing? We decided to do some further research and here is what we found.

No matter what ear challenge one may be dealing with, here are some commonly known facts about Ganoderma.

Ganoderma is antiviral, antibacterial, and increases natural killer cells, beneficial to sinus clearance which will promote a healthy inner ear environment. If the ear challenges you are dealing with have anything to do with the above mentioned, Ganoderma may be something you want to consume! In fact, here's a story of a person with ear challenges sharing their experience with Ganoderma.

'For years I suffered with something medically termed as 'Tinnitus' I never got diagnosed but the symptoms were pretty much identical where one of my ears were constantly blocked. I remember it started happening after a bad ear infection a few years back. Symptoms were having wet ears where water would get stuck in the canals, ringing, buzzing, muffled sounds, decreased awareness in certain situations such as really busy places or outside in the dark, throbbing, itching and even squeaking!

I had literally tried everything from ear drops, not putting my head under water for prolonged periods, ear wax candling and tried popping my ears so many different ways.

For anyone who might have experienced something similar you will know that the constant acute deafness in one ear and the high pitched ringing is just something that you learn to deal with day in day out and forget about it but it's like it's always there making you less happy than you could be if you just unblocked your ear! Well I can greatfully say that after a few months of my ear doing some weird stuff that my ears are finally unblocked. Water does not get stuck any more, the ringing is gone, I feel more aware and in balance and there is no itching or blocked feeling! I'm guessing Ganoderma has something to do with this!

- Social Media Marketer, London

WHAT WILL THIS DO FOR MY ENERGY?

WHAT IF I HAVE A HEALTH CHALLENGE WITH MY ENERGY?

What a great question, and for those of us wishing we had more energy, what will this really do for energy? We decided to do some further investigation and here is what we found.

People who consume Ganoderma notice they have a smooth, calm, aware, relaxed focused energy, not a crazy energy. This is the case with all of our products, and this comes in addition, with no crash at the end. Energy with no crash? Is that possible? Of course it is.

Ganoderma is proven to detoxify your system (toxins make you tired) control inflammation, increase nitric oxide, increases oxygenation, increases mitochondria production, all of which give your body more fuel to function the way it was designed to! You can be sure that consuming Ganoderma regularly will surely assist you in having more energy.

In fact, here's a story of someone with a health challenge related to their energy, and here is what they experienced.

'Wow! What a difference this energy drink made this year! I found with other energy drinks it would make my skin feel itchy, my stomach would often be upset and I'd come down from it afterwards. With the XT, I felt a much more consistent energy throughout my game and it would be super easy going on my stomach. It would give me long lasting energy that I could rely on for the whole 60 minutes of the game. I found that my legs would be less fatigued which also gave me a competitive advantage!'

- B.C.

WHY IS OURS A BETTER OPTION?

MEAL REPLACEMENT

OGX FENIX

- **13g of rBGH free whey protein concentrate** - helps curb hunger and supports lean muscle.
- **3g of prebiotic fiber** - clinically studied, fiber supports good digestive health.
- **Only 7g of natural sugar**
- **Contains Ganoderma**
- Contains Full spectrum of Branched-Chain **Amino Acids**
- **Vitamins and Minerals**
- Provides three important **electrolytes-sodium, potassium and chloride**
- **Low fat**
- **Gluten Free**
- **Supports Digestive Health**
- **Supports Immune System**
- **Lower carbs than other brands**
- **Packed with Protein, Nutrition and Flavor**
- **Simple**
- **Fast**
- **Affordable**

OTHER BRANDS

- **The vitamins and minerals are synthetic**
The vitamins and minerals are usually synthetically made and are not derived from food, making them tough to properly absorb.
- **Too much added sugar**
These shakes often contain lots of sugars, artificial sweeteners or a combination of both. Too much added sugar can lead to moodiness, dips in energy levels, stomach upset and worsened overall health due to inflammation.
- **Contain multiple artificial ingredients**
Several highly processed ingredients found in bottled meal replacement shakes include refined vegetable oils, shelf stabilizers, thickeners and preservatives, and color and flavor enhancers, all of which have harmful side effects
- **Most are low in protein**
Because most commercial shakes don't contain any real high-fiber foods, they might not make you feel very full for long, even when they do provide lots of calories, and the protein usually comes from conventional dairy or processed protein powders.
- **Can make inflammation and indigestion even worse**
None of the synthetic products in them are beneficial for gut health and can lead to a cascade of inflammatory symptoms that affect the whole body.
- **Likely won't help with weight loss**
Meal replacement programs for weight loss are neither healthy nor likely to work as a means of lasting weight loss/maintenance because they quickly leave you feeling deprived, restricted, low energy, socially isolated and full of cravings for the foods you actually enjoy.

WHY ISN'T THE COFFEE ORGANIC? WHY ISN'T IT FAIR TRADE? WHY ISN'T IT FDA APPROVED? IS IT TESTED FOR MOLD?

We had the exact same question you may be asking. If the product is so awesome why aren't all the coffees organic? Fair trade? FDA approved? or tested for mold? We wanted these answers just as much as you do. We decided to do some extensive research and here is what we found.

WHY ISN'T THE COFFEE ORGANIC?

To label a product organic, and go through the process to certify it organic, it automatically drives the price up 2-3X, knocking the average consumer out of the market. Organo has gone to the highest standards to make sure you're getting the best coffee on the planet. **Our Ganoderma is 100% Certified Organic, GMP (Clean room environment), Kosher, Halal, and Organo has many other top notch certifications as well.** Many people switch from their organic coffee to Organo coffee and they feel WAY better because of the Ganoderma infused in the coffee. **You can be sure you're still getting the best coffee on the planet, at an awesome price.** Our coffees are clean enough and pure enough to be labeled organic, but due to the increase in price for you the consumer, we decided to have top notch quality without that certification. **In addition to this, we do have an organic coffee and tea option for you as well.**

IS IT FAIR TRADE?

Since Organo is a Ganoderma company, not a coffee company, we cannot certify Fair Trade as we purchase from a long list of premium quality coffee vendors. However, Organo would never participate in unfair trade practices. All the workers and harvesters are paid fairly, well taken care of, in a great working environment, and happy.

WHY ISN'T IT FDA APPROVED?

Coffee is not a food or a drug, therefore this certification does not apply. Ganoderma is a medicinal mushroom; not a drug. **All Organo's products feature US Food and Drug Administration, Health Canada, and/or European Union approved ingredients that have met the scientific safety criteria set forth to qualify for such claims as GRAS (e.g. "Generally Recognized As Safe")**

IS ORGANO COFFEE TESTED FOR MOLD?

Yes absolutely. We couldn't have a product that tasted so good, if it contained mold. Organo products are tested for mold and Mycotoxins, substances produced by mold. Coffee beans with mold will not be used in our products. Organo tests and rejects raw materials with any trace of mold. Also, we keep our beans fresh and store them at the correct temperature and hygrometry.

WHAT ABOUT MUSHROOM ALLERGIES?

We totally understand that if you're allergic to food mushrooms, you would think a medicinal mushroom would be bad for you. Some of us rare few are allergic as well, and felt the exact same way towards Organo products. But upon further research, here's what we found:

Food mushrooms and medicinal mushrooms are in a separate category from each other. They each have a completely different protein coat making your body respond to them in their own unique way. In fact, medicinal mushrooms may even reduce sensitivity to things you are allergic to, including food grade mushrooms themselves. In addition, **Ganoderma is known to help the body fight against viruses, funguses and bacteria**, supporting you in eliminating these things from your system, making it an excellent choice for those on restrictive or elimination diets. **Ganoderma also increases good bacteria in your system**, supporting you in increasing your immunity and overall health.

YOU ASK:

What if I experience something uncomfortable drinking these products?

This is rare, but in many cases this is a very positive sign.

So you've consumed the product and now you're feeling a bit uncomfortable? We know exactly how you feel. In rare cases this does happen and it can be perceived as a negative. But upon doing our research, we found out this was a major positive. This means the product is WORKING! Here is why:

A detox experience may include-
Headache, coughing, possibly temporary skin reactions, frequent use of the bathroom, stomach uneasiness, and some other small disturbances.

These are very positive signs, the product is doing what is it designed to do, creating a healthier environment inside of your body. Don't be alarmed, better out than in. This is usually very short-lived and many people feel better after a short period of detoxification, than they have in YEARS.

If you experience this, start taking 3 spores per day until this experience subsides, 1 week - 1 month usually.

Remember to drink PLENTY of water, especially when taking lots of spores, so your body can detox effectively.

WHY IS OURS A BETTER OPTION?

ENERGY DRINK

FENIX XT

- Helps support **energy, stamina, focus**
- Has **antioxidants**
- **Lower sugar** content
- **No crashes**
- **Less caffeine**
- **Less Taurine**
- 100mg of **natural caffeine**
- **Contains Rhodiola** (used by Olympians) to support Stamina and endurance.

OTHER BRANDS

- Energy drinks, shots and other energy products contain large amounts of caffeine and an assortment of other ingredients.
- Consumption of large amounts of caffeine may lead to serious cardiovascular events, seizures and death.
- Heavy consumption of energy drinks may result in excessive consumption of B vitamins, such as niacin or pyridoxine, and may result in liver or nerve injury.
- Adolescent consumption of caffeine has been linked to dependence, poor sleep and possible developmental problems.
- Alcohol mixes with caffeinated energy drinks puts adolescents and young adults at serious risk of self harm and other harm.

ADVANTAGES ORGANO PRODUCTS

ORGANO BEVERAGES

- Delicious Gourmet Flavor
- Incredibly Convenient (You Can take 100+ coffees through airport security!)
- More affordable than single serve gourmet competition
- Powerfully nourishes the body (Vitamins, minerals and over 100 antioxidants)
 - Reduces Body Acid (most coffee's acidify)
- Provides Smoother Energy (many people have ups and downs with other coffees)
 - Improves Sleep by calming the brain and body
- Improves Acid reflux (most coffee's aggravate reflux)
 - Improves Oxygenation
 - Improves Immune Defense
 - Naturally detoxifies
- Blood sugar friendly Latte and Mocha (Ganoderma has many blood sugar balancing properties)
 - Supports Metabolism (Many people lose weight after switching to Organo)

OG DX is a delicious and effective Detox drink that is unique to the market. The competition is essentially recipes for Detox drinks that either do not taste good and or are minimally effective. OG DX combines 8 different superfoods with vitamins and minerals with proven benefits to the Liver, kidneys, lungs, gut, skin, lymphatic and stress systems. A delicious and effective blend with only 20 calories makes OG DX a phenomenal choice.

OG XT is a delicious much lower calorie and much healthier option in the energy drink market. OG XT provides smoother and longer lasting energies without crashes. The great product utilizes natural sources that have been proven safe and effective over the centuries of human use. Additionally OG XT has the king of herbs ganoderma which according to many sources is the most nutritious herb on the planet.

OGX Fenix is a phenomenal body composition product that is revolutionizing the weight loss market. Fenix has the advantage of both delicious taste and smooth texture. The most common description of our product is that it tastes like liquid birthday cake.

OGX nourishes consumers with a combination of vitamins, minerals, high biologic whey protein and the kings of herbs Ganoderma.

In addition to being delicious and healthy, OGX also crushes the competition by being both incredibly convenient and cost effective!

OGX is Gluten Free, Soy Free and Non GMO

ORGANO'S WORLD CLASS PRODUCTS

Grapeseed extract oil- One of the most powerful antioxidants around. Amplifies the affect of all of our products and helps them work much faster and much more effectively

Lucidium- Great for anything to do with your health. Will enhance health and function of every system of your body.

"I TRIED THE COFFEE AND IT DIDN'T TASTE ANY GOOD, OR I'VE HAD INSTANT COFFEE AND IT DIDN'T TASTE GOOD. *Why would this be any different?*"

"I LIKE TO BREW MY COFFEE."

"WHY DO YOU HAVE AN INSTANT COFFEE AND NOT A BREWED COFFEE?"

"CAN I GET THIS COFFEE IN BULK QUANTITY, NOT BY THE SACHET?"

These are great questions, and are questions many of our coffee connoisseurs have asked us. And we felt the exact same way. Traditional instant coffee does taste pretty bad. We decided to investigate Organo's preparation process and here is what we found.

"Certain brands of traditional instant coffee tastes like sandpaper" is what we've heard from some people who have tried instant before. What makes Organo so delicious?

If you tried our product and didn't like the taste, chances are 1 of 2 things happened:

1. *You may have used too much water. 6-8 oz brings best taste. 2-4 oz for espresso style. Or*
2. *You drank the coffee with your previous instant coffee experience at the front of your mind, or had a preconceived thought of how it was going to taste.*

If you tried the coffee and didn't like it, we encourage you to consider these 2 possibilities and have another cup with an open mind. When consumed with an open mind, people report that this coffee is as delicious or better, than their favorite gourmet coffee brand.

Each one of our coffees contains a proprietary amount of Ganoderma, and is separated out into single sachets.

If this was in bulk quantity, all the Ganoderma would sink to the bottom of the bag, and there would be no quality control behind giving you what you want in each cup. Many people find the sachets to be INCREDIBLY convenient, and can literally be made anywhere! All you need is hot water. In fact, that leads us to our next topic.

So... what makes Organo coffee different from traditional instant coffee?

Our coffee is actually pre-brewed, not instant. It's a completely different process... and when you taste ours versus traditional instant, we think you'll agree that there is something very different.

Many people love this as much or better than their favorite gourmet coffee, due to our phenomenal pre-brew technology. Our coffee is slowly roasted and brewed using the finest gourmet Arabica beans (free of mold and mycotoxins) and demineralized water. It then undergoes a cutting-edge drying process that, unlike conventional instant coffee, allows it to retain the natural aroma of our premium beans. In addition to this, we keep our beans fresh and store them at the correct temperature and hygrometry, making this the most delicious, most convenient, best for your body and most affordable gourmet coffee around for you.

DOES YOUR COFFEE DO THIS?

ADVANTAGES OF ORGANO COFFEE

- Delicious Gourmet Flavor
- Incredibly Convenient- Can be made anywhere with hot water (No machine required)
- Saves you money, compared to other gourmet coffees out there
- Countless benefits as follows

ORGANO COFFEE

- Powerfully nourishes the body- vitamins, minerals and over 100 anti-oxidants
- Alkaline, balances pH (improves acid reflux)
- Natural detoxification
- Boosts Immune System
- Improves sleep by calming the brain and body
- No jitters, No crash, No anxiety
- Supports Metabolism- many people lose weight after switching to Organo!
- Supports athletic and academic performance- Oxygenation of body and mind (Super charges your brain), rehydrates, better focus and recovery
- Blood Sugar friendly (and delicious) Latté, Mocha, and hot chocolate
- May help decrease dependence on chemical substances
- Increased nitric oxide (The viagra effect)

VS

REGULAR COFFEE MAY HAVE THE OPPOSITE EFFECT FOR SOME PEOPLE, INCLUDING

- Can aggravate acid reflux
- Upset stomach
- Headaches
- Jitters, crashes
- Challenges falling asleep due to caffeine (Can't be consumed past a certain time)
- Increased anxiousness
- Other lattes and mochas may raise blood sugar, and contribute to weight gain

MAY WE SUGGEST YOU MAKE THE SWITCH TO THE HEALTHIEST COFFEE/TEA IN THE WORLD AND SEE WHAT BENEFITS YOU EXPERIENCE?

MIGHT THIS BE GOOD FOR A PERSON WHO HAS TROUBLE FOCUSING? IS IT SAFE TO CONSUME IF I HAVE ADD, ADHD, ALZHEIMER'S OR DEMENTIA?

We had the exact same question you did, could this increase my focus? We knew Ganoderma brought higher oxygenation to the brain, and decided to do further research. Here is what we found.

Many people experience better focus, better grades, better behavior in their children, better handwriting, faster comprehension, better mood, and better memory retention upon consuming Ganoderma. In fact, here is the story of a person who consumed Ganoderma and shared their experience about how it helped their focus.

'My mother has been on the spores since August of 2015. She is a diabetic and lost her left leg due to complications. She also has early signs of dementia. My mom is 81 and recently went to live in the nursing home. Since using the Ganoderma Spores my mom's dementia has lessened. She now recognizes her family and is able to recall everyday events. She recently had a cough and cold that only lasted a few days...not like the other residents who were ill for two and three weeks. Her diabetes is controlled. Blood sugar numbers are around 100 or so daily. She gets 14 units of insulin each morning. Previously her numbers were a lot higher... 150 to 180... and she was getting 40 units of insulin. Overall health and mental awareness and alertness has changed for my mom. Even the nursing staff at the nursing home is aware of the positive changes my mom is experiencing. They always call me and let me know when she is running low. Last August my mom had an ulcer on her foot. After three months of trying to heal it, I was introduced to Ganoderma last August. Her healing was almost miraculous. The spores showed dramatic healing within 24 hours. I now have my mom taking 4 to 6 spores daily for her health maintenance.'

- J.J.

WHAT ABOUT MY HAIR AND NAILS?

That's a great question. When people consumed Ganoderma they noticed their hair and nails were stronger, healthier, shinier, and we all became very curious. We decided to do some research and here is what we found.

Hair and nail growth is a sign of vitality. By increasing immunity, oxygenation, alkalinity, and overall well-being, hair and nails naturally improve. Hair and nails become thicker, shinier, and grow faster.

In fact, here are a few stories of people who started consuming Ganoderma and noticed amazing benefits in these areas!

'As I got older my hair began turning grey but I felt my hair darken some when I began using the spores. A friend, and my brother who is a barber, they both noticed that it had become darker in the back of my head from it darkening in color and from more hair growth.'

- D.A.

'Yes my hair has been growing very fast since drinking organo products, & my dad has noticed he is going to the barber's more often!'

- K.W.

'I wear artificial nails. When I went for my monthly appointment this week the nail tech remarked about how much my nails had grown.'

- N.W.

THE BEST HANGOVER SOLUTION

Organo Products

After a night of drinking the body is dehydrated, some people even wake up with a headache or stomach ache. **Ganoderma within the body has been known to quickly rehydrate the cells, cleanse and support the liver, reduce inflammation, and nourish your body back to its natural state.** Some people even consume the products before or during drinking, such as taking spores beforehand, or mixing OG DX with a drink, to help buffer the uncomfortable side of alcohol. As soon as you wake up after a night of drinking, get some Organo products into your system, and you'll feel the incredible difference it makes for you!

Here's a testimonial on how Ganoderma spores helped to relieve hangover symptoms:

'I have had several patients tell me that after they wake up in the morning after consuming alcohol, if they have a King of Coffee first thing when they wake up their hangover completely resolves. Another great benefit of the Spores clearing and detoxing the liver. Literally within minutes they feel better!'

- Doctor, Canada

WHAT ABOUT HEART CHALLENGES?

This is a great question, and very important to be aware of if you have heart challenges. Is Ganoderma okay to consume if I have heart challenges? We decided to do some further research and here is what we found.

Ganoderma is anti-inflammatory, is a regulator of nitric oxide (considered by many the most important molecule related to heart health), lowers blood pressure, lowers bad cholesterol and raises protector cholesterol.

In fact, here's a story of a woman who began consuming Ganoderma and here is her story of what she experienced.

'Before Hurricane Harvey I had gone to my doctor's, I had a problem and he put me on an EKG machine and told me that my biological pace maker which we all have..that my heart was pumping before the pace maker was firing. So, when the pace maker fired there was no blood in the heart to pump. He was going to take me to a specialist but then Harvey hit and I got flooded. David come in and put me on the Spores and the Ganoderma and the Mycelium and I was taken out through the reconstruction of my house. I have been on them from the end of September to December I have a month still on them...I'm not giving them up! But I went into the doctors, they did another EKG on me and my heart is TEXT BOOK PERFECT! And it's the Spores...I know it is!'

- C.F.

HOW ABOUT INFLAMMATION, ARTHRITIS, FIBROMYALGIA, SURGERY RECOVERY, AND TYPICAL BODY PAINS?

We totally understand the question and we had the exact same thought. Would this be okay to consume if you have a pain challenge or just had a surgery? Upon further research, here is what we found.

Ganoderma is known to calm inflammation, increase alkalinity which decreases acidity and helps with pain, oxygenates the body which is healing to the tissues, increase immunity and bring nutrients to the body which is good for recovery. In fact, we have some people who have consumed our products with pain, and here is what they experienced.

'When I originally jammed my finger, it swelled up so big I thought it would be 1 week minimum for me to do anything with my hand. I started taking the spores, and 48 hours later I was back on the basketball court and in the gym with 0 pain.'

- Jacob Rakowski

'I had allergies, chronic pain, high blood pressure, fibromyalgia and a constant headache to name a few. Now, I am off of my allergy meds, my blood pressure is lower, my headaches are fewer, and my chronic pain is less. I consume 2 black cups of a coffee and OGX shake in the morning. I have a DX in the late morning. I will have a Latte in the afternoon. I used to have to nap everyday. Not anymore! I have more energy than I have in years!! I love my OG!!

April update: I added in 2 spores in the morning and 2 spores in the late afternoon. Feeling even better. I have lost almost 15 pounds, almost ready to get rid of blood pressure meds, I still am headache free, and my chronic neck pain is continuing its decline! Change your coffee.....Change your life!'

- Chris Huth

ORGANO™

Cafe Latte Pudding

YIELDS: 3 SERVINGS

**2 SACHETS *ORGANO*
*CAFE LATTE***

**2 CUPS HOT WATER
5 GRAMS POWDERED

4. POUR MIXTURE INTO INDIVIDUAL BOWLS AND REFRIGERATE UNTIL FIRM.
5. TOP WITH CHIPPED CREAM & COFFEE BEANS, AS DESIRED.

CALORIES: 180 / SERVING

PREPARATION TIME: 2+ HOURS

WHAT ABOUT LUNG FUNCTION? IS THIS OKAY TO CONSUME IF I HAVE ASTHMA OR SOME OTHER BREATHING CHALLENGE?

We had the exact same question, would this be okay to consume with asthma, or some other breathing challenge? We know the power of Ganoderma so we decided to do some research and here is what we found.

Ganoderma is proven to dilate airways more effectively than medical inhalers! It decreases inflammation and increases oxygenation, which makes breathing easier. The red tea also contains a superfood called cordyceps which is incredible for breathing, for those that would like an extra boost for their breathing. In fact, here is a story of someone who used Ganoderma to increase their lung function and here is what they experienced.

'When I received my first order from Organo, I was severe COPD diagnosed, my lungs were at 23% capacity and 2 months before I joined Organo my pulmonary doctor actually told me that nobody has ever recovered from 23% and that the next time I get sick I will end up intubated the rest of my life before I would die. I said I'm not going to go on a machine the rest of my life, that's not living. So, in August of 2013 somebody gave me some samples of Organo and 21 days after I started drinking the product I came off of oxygen. That was September 15th, 2013 and I have not taken oxygen since. My lungs went from 23% to 29% to 34% to 40% and now this summer I am able to walk up to 5 miles at a time without any type of assistance. Ganoderma works!'

- W.B.

WHAT ABOUT **LYME?** **LUPUS?** OR FOR THAT MATTER ANY OTHER **AUTOIMMUNE DISEASE?**

We totally understand the question, we wanted to know too if this was a good idea to consume too for a person with Lymes or any other autoimmune disease. We did some further studies and this is what we found.

Ganoderma is antiviral and antibacterial, immune enhancing, oxygenating, alkalizing and energizing for the body. In addition to this, Ganoderma increases natural killer cells which strengthens the body's immune defenses. All of this may make a person have a more pleasant experience with dealing with something as serious as Lymes, Lupus, or any other autoimmune disease. In fact, here is the story of somebody with an autoimmune disease sharing their experience using Ganoderma.

'The Spores and Mycelium have changed my life. I have been struggling with Lyme's Disease for the past three years. It has put me in the hospital twice and I started a regimen of the Spores. I did two every two hours I was awake and the same with the Mycelium. I have been a body builder for the last eight years and I had to quit training because the Lyme's was affecting my body so terribly so I started taking these supplements. It gives me goosebumps just talking about it because I can start training again. My joints don't hurt, I have got energy like before I got Lyme's Disease and the brain fog is gone. I am 110% better with these products.'

- T.S.

WILL THIS INTERACT WITH MY MEDICATIONS?

We totally understand the question. Many of us take medications and think that something may interfere with them. We also had the exact same thought you may be having. But upon doing further research, here is what we found:

Your body is your body, so the choice is yours, however, we would like to share with you some facts. **There is no known negative interaction between medications and Ganoderma, and many published medical studies support this.** Many people actually save a lot of money eventually, because Ganoderma helps support the challenge that they are taking medication for. In fact, we even have a testimonial listed below of a woman who was able to eliminate all of her medications after several months of consuming Ganoderma.

The only people who may have to be mindful is those taking blood pressure and blood sugar medication. The key is to keep monitoring your levels, to make sure they stay within a healthy range. Continual effective use of Ganoderma may even be able to help you reduce these medications as well. But to answer the original question once again, there is no known negative interactions between Ganoderma and medications, and many published medical studies support this.

'My health improved with Ganoderma so these medications were no longer needed; Thyroid, Hormone Replacement, Pain, Inhalers, Steroids, Antibiotics. My joints feel so much better. My immune system protects me better than ever. Reduced Cholesterol & Triglycerides levels and reduced blood sugar levels.'

- B.P.

Threw these medications away on 5-29-17

WHAT ABOUT MIGRAINES & HEADACHES?

I'VE TAKEN EVERYTHING AND NOTHING WORKS.
WOULD THIS BE OKAY TO CONSUME IF I HAVE REGULAR
MIGRAINES, OR CHALLENGES WITH HEADACHES?

What a great question, we were very curious about this one as well. We decided to do some research and here is what we found.

Ganoderma is known to decrease inflammation, bring oxygen to the tissues, increase nitric oxide which is known to improve circulation, helping heavy pain subside from things such as headaches and migraines.

In fact, here is the story of a young lady who dealt with migraines from age 10 to age 20, tried all kinds of drugs and medications, and shared her experience about consuming Ganoderma.

'Well I had migraines for 10 years I am now 20 and I had been to several different neurologists and no one had any answers until one of them tried to put me on preventatives and they gave me all of these crazy side affects and she had to wean me off because my dose was so high because I would have seizures if I just stopped taking them.'

They only helped a little but they didn't completely go away. On a normal week I would have at least 4 migraines so it was almost as if I constantly had one because they took forever to go away. Until my mom introduced me to the Organo Gold coffee and I drink a mocha every morning and haven't had a migraine in almost 7 months! And if I feel a headache coming on I will drink another one and it's gone within ten minutes.'

- B.B.

WHAT ABOUT MULTIPLE SCLEROSIS?

That's a great question and one we are asked from time to time, and we were curious too, is this okay to consume if I have something challenging going on with my system like multiple sclerosis or something similar to it? We decided to look further into it, and here is what we found.

Ganoderma produces a sense of well being in the body that increases immunity. In addition to this, Ganoderma is known to reduce brain/full body inflammation and increase brain stem cells! It also brings more oxygenation to the entire body, facilitating an overall state of well being as we mentioned before, helping your body become stronger.

In fact, here's a story of someone who consumes Ganoderma with multiple sclerosis, and here is what they experienced.

'In September of 2016 I was diagnosed with multiple sclerosis at my worst I could not walk. I was wheelchair bound I couldn't do anything for myself it was very difficult to say the least it was a really bad time if I'm going to elaborate. I was in the hospital for 8 days, doctors couldn't figure out what was going on with me they put all kinds of drugs in my body and I looked like a drug addict. I had black and blue marks all over my arms and they didn't want to let me go. Now today I can now thank god, my family, my friends, Lucy, Dr.Bob and everyone they work with. I am feeling incredible I'm living again. I enjoy life. I was tested positive for the John Cunningham virus and they put that fear in me that with or without medication I could always develop PML which is basically multiple sclerosis but fatal within months...so I was preparing for my funeral. I was preparing to say goodbye to my kids and now I'm enjoying life and my kids are extremely happy with my progress... you know it's been a wonderful experience'

- A.Z.

WHAT ABOUT MUSCLE GAIN?

We had the exact same question, could this benefit muscle gain? We know Ganoderma has been seen to do a lot of awesome things for the body. We decided to do some research and here is what we found.

Ganoderma is known to help decrease inflammation, increase oxygenation, decrease unnecessary toxins, alkalize the body, bring necessary nutrients to the body, and increase natural energy. In fact here is a story of a person who consumed the OGX shakes, and after following a proper workout regiment, here were his results.

'After many years of not being able to gain any muscle at all, no matter how much I worked out, due to a pretty fast Metabolism, I've gained 12 lbs of muscle these past couple of months! I started drinking 4 scoops of OGX per day, 2 scoops in the morning, 2 scoops after a workout working out 5 days a week, and consistently ate a good clean diet with lots of water and seemingly by magic, my body got what it needed to gain 12lbs of muscle'

- Jacob Rakowski

WHAT ABOUT PARKINSON'S?

What an awesome question and one we were very curious about as well. Is this okay to consume if I have Parkinson's or any other challenges to do with my central nervous system? We decided to do some research and here is what we found.

Ganoderma is known to reduce all of the major risk factors known for Parkinson's. It helps tremendously with inflammation, helps detoxify the body, regulates blood sugar, enhances the brain's energy efficiency, and is very calming to the brain and body. With all that said we think it would be great for a person with Parkinson's to consume Ganoderma!

In fact, here is a story of a person with Parkinson's who regularly consumes Ganoderma. Here is their story.

'Once in a while people ask about Ganoderma Lucidum and Parkinsons.....well we have a 71 year old man who has only drank the Black Coffee so far, for 2 weeks. In 15 minutes of his first cup he felt something in his brain. Through the two weeks, he's walking better, feeling much, much better, has began sharing it with friends and became a distributor. He shared it with his retired doctor who said...:yeah, yeah, I don't know about that stuff"...but he told him..."I can see a big difference in you!" Can't wait to see when he goes to the Spores or Mycelium what will happen! Cool stuff!'

- R.W.

SHOULD I GIVE ORGANO TO MY *Pets*

Can I give this to my pets you ask? That's a great question and we wondered the same thing. Many of us OG pet owners came to the same conclusion that if Ganoderma is good for us, it makes sense that it would also be great for our pets so, we put it to the test and here are some of the results...

Many pet owners are also experiencing the benefits of Ganoderma. Animals, just like humans face the same health challenges. Whether it's pain management, immune support or general challenges, your pet can also benefit from this superfood. We've seen many pets of all kinds with a variety of challenges feel and behave better with the nutrition that Ganoderma can provide. Pet owners have put the Ganoderma capsules in their pets' food, given capsules to pets in a piece of meat or cheese, or given pets a scoop of vanilla OGX well mixed with water, and have seen their pets' energy incrementally improve. All that Ganoderma has been reported to do for humans, it will most likely do for pets. If your pet has a health challenge, give Ganoderma a try and see what benefits your pet may experience!

Now, many pets and their owners are also experiencing the benefits of Ganoderma.

See below what was experienced by one pet owner that used Ganoderma:

'Charlie was diagnosed with mast cell cancer in his front left arm, and given 6 months to live. His front left arm swelled up big like a golf ball. We had the choice to either amputate his leg, put him to sleep, or possibly try out the products. We figured it couldn't hurt to try. We gave him 2 spores a day wrapped in meat or cheese, and he acted like the same dog for the final 3 years of his life, until the final 2-3 weeks of his life. In this time his arm shrunk about 50-60% in size back to nearly normal. We are so grateful for these amazing products. Our dog was with us an extra 3 years healthy and happy. Try them on your pets, healthy or not healthy, and see how your pets feel!'

- K.R.

SHOULD I GIVE ORGANO TO MY *Pets*

Can I give this to my pets you ask? That's a great question and we wondered the same thing. Many of us OG pet owners came to the same conclusion that if Ganoderma is good for us, it makes sense that it would also be great for our pets so, we put it to the test and here are some of the results...

Many pet owners are also experiencing the benefits of Ganoderma. Animals, just like humans face the same health challenges. Whether it's pain management, immune support or general challenges, your pet can also benefit from this superfood. We've seen many pets of all kinds with a variety of challenges feel and behave better with the nutrition that Ganoderma can provide. Pet owners have put the Ganoderma capsules in their pets' food, given capsules to pets in a piece of meat or cheese, or given pets a scoop of vanilla OGX well mixed with water, and have seen their pets' energy incrementally improve. All that Ganoderma has been reported to do for humans, it will most likely do for pets. If your pet has a health challenge, give Ganoderma a try and see what benefits your pet may experience!

Now, many pets and their owners are also experiencing the benefits of Ganoderma.

See below what was experienced by one pet owner that used Ganoderma:

'I just LOVE Organo! I love what this herb has done for our family. The health benefits go on and on.... Now our sweet dog has been able to benefit as well! I had to share our latest little miracles. Our goldendoodle just had her 3rd litter of puppies yesterday (Mother's Day of course!). Her first litter she had 10 puppies. However one was stillborn and one didn't make it past a couple of days. Her second litter she had 7 puppies. Her 3rd try was a miss (she couldn't conceive at all). I really felt like her hormones were "off". So I decided to add spores to her diet as soon as she went into heat again. She has had at least 2 per day ever since. Yesterday she had 12 gorgeous and super healthy puppies! We were so shocked! It was her best pregnancy and labor she's had so far.....and she is one proud momma!'

- A.A.N.

HOW ABOUT LADY ISSUES? CHALLENGING PERIODS? PMS? MENOPAUSE?

What an awesome question. We were thinking the exact same thing, as we decided to do some research on this. Here is what we found.

Ganoderma does a lot to help regulate the body's hormones, give the body important nutrients it needs, oxygenates the body, helps the body buffer stress and decreases inflammation, which are all factors in that rough time of the month, and around the time of menopause for women. We have many women report that since consuming Ganoderma, their periods have gotten lighter, more regular, and women going through menopause have experienced little to none of the hot flashes, sweating, and all the other uncomfortable stuff during menopause. Many women who usually have very intense PMS around that time of the month report that their stress, pain, mood swings and irritability have noticed a large reduction in those types of symptoms.

In fact, here are a couple stories from women who have consumed Ganoderma and shared their experience around these issues.

'My husband and I have been married for 42 years he's 68 and he is in great shape we have always had an active and healthy lifestyle and in regards to female menopause I didn't get any of the typical symptoms like hot flashes and night sweats but I was real krabby for about 6 months and didn't feel like myself. Then I started to develop extreme vaginal dryness because of the menopause and tried so many different things to alleviate the discomfort such as, coconut oil and natural remedies we had on hand. My husband started on the product the same time as I did as I bought him his own business for his birthday so his gift from me was Organo at the Gold level. We started to celebrate the fact that we could drink coffee again as we were avid coffee lovers but started to realise that regular coffee was messing with our sleep cycle but now we literally drink as much coffee as we like! After a few months of consuming the product we noticed that the vaginal dryness got less and less and now there is none. Organo has not only allowed us to rekindle our love for coffee together but, has also improved our love life!'

- G.D

"I took birth control for 5 years. 2 years ago I tried to get off for 6 months and my monthly cycles were very confusing. Sometimes I had menstruation 2 times /month sometimes I had no cycle for 2 months, so I started take BC again. Finally I got rid of my birth control medicine April 2018 and since then I lost weight from my hips and stomach using Ganoderma. My cycles now come exactly every 28 days, which is the perfect cycle, and have every month since I got off BC. Ganoderma balanced my system perfectly.'

- Anonymous

WHAT ABOUT ORGANO AND PREGNANCY?

We totally understand that you are hesitant to introduce something to your body you are unsure about whilst pregnant. Many of us OG Moms have felt the same way you're feeling but knew Ganoderma was good for us and figured it could be very good for our baby too. So, we decided to consume it in small amounts at first to see how we were feeling and how it affected us. However, your body is your body, so the choice is yours but we would like to share with you 2 stories of people who described their pregnancy experience, using Organo products...

- Ogx Protein Shake
- Organo Coffee
- Spores Capsules
- Mycelium Capsules
- Weekly Chiropractic Care

"This was my choice of prenatal care for my entire 3rd pregnancy. No prenatal vitamins or vaccines. Weight gain was 1/3 of usual. No swelling. Natural delivery. Rapid recovery

My 2nd child had high Bilirubin levels, we spent over 4 days in the hospital and was consulted by pediatric Nephrologists. The Drs said my son was having a hard time detoxing the bilirubin because of my husband and mine blood types clashing. We were to expect the same with anymore children we had. By researching Organos products I was ready to CHALLENGE the medical Drs and the product!

My daughter Jennalyn is my Organo Baby! We spent 24 hrs in hospital and her bilirubin levels were perfect! 6 hrs of birth and 8 hrs from spores her body was detoxing! I am blown away with ALL the products. I have seen such a difference in my pregnancies and post delivery I strongly recommend ALL Organo products to any women who are or planning on becoming pregnant!"

- A.R., Winsconsin

'At age 29, doctors told me I could never have babies. This made me sad, but I believed the right strategy it could be possible. I believed it could happen, I took 10 spores per day, and drank 1 litre of Red Tea per day for 1 year. I just got married and our little man is now on the way. I've been drinking the products throughout my pregnancy and it's made it very easy and enjoyable. Thanks Organo for changing my life!'

ORGANO

ORGANO

CAN GANODERMA BENEFIT SEXUAL FUNCTION?

How could Ganoderma help with this?

Those are some great questions! We thought the same things but upon further research, here is what we found.

Ganoderma has been reported to increase nitric oxide (in a similar way to Viagra) **and brings oxygen to all of the tissues, increases energy, and may benefit your hormones as well.** Now, people who had limited or no sexual function for a long period of time feel a whole new lease on life! If you already have a healthy love life, then look out!

In fact, here is the story of someone who reported they had experienced a better sex life just by consuming Organo products!

'I am a home caregiver and mother of 5. I've been married for over 30 years. At the age of 30 after 4 sons, my husband could not have sex. We went to Honolulu for over 10 years to get this fixed. Lots of shots and medications. Nothing worked. I missed sex. I was told that Cafe supreme is the best one night stand or marriage counselor in a box! I did not know my husband was drinking this supreme.

The first night I came home about 4 am and he rolled over and it was like we were 20 years old again. I could not believe this. I was so tired but excited at the same time. Then the following nights I slept on the couch, because I was too tired for sex. Now I am so tired but he always wants it!'

WHAT IF I GET SICK PRETTY OFTEN?

WHAT IF I'M PRETTY SUSCEPTIBLE TO COMMON ILLNESSES, OR SEASONAL SICKNESSES?

This is a great thing to consider and something we wanted to look into as well. If I find myself sick more often than I'd like to be, how will Ganoderma affect me? Upon our further research, here is what we found.

Ganoderma is proven to be antiviral, antibacterial, to strengthen the immune system, decrease inflammation, increase oxygenation, and increase natural killer cells which also fight against serious viruses and illnesses. All of these contribute to a healthier you, and improve your resiliency against common and seasonal illnesses. In fact, there are people now consuming Ganoderma who swear that since they started, they haven't been sick in years. If they get under the weather at all, it's for a shorter period of time than they are usually sick, it's less intense, and they get sick only a once or twice in a period of several years, when it used to be much more often.

Here's a story of someone who used to get sick multiple times a year with seasonal illnesses, and now has barely gotten sick at all since joining Organo!

'We live in the area of the world where it gets dark early and is cold for about 4-6 months in the winter. We've lived here for the last 78 years and nearly every winter I can remember, me and my husband have gotten some kind of cold or flu. This past winter we did not get sick one time. The only thing we changed was switching our normal Coffee to the OG Coffee. I feel more energy, no crash, and a stronger sense of wellness when I drink the coffee.'

- B.R.

WHAT ABOUT SKIN?

That's a great question that we were curious about as well. If a person is feeling overall better, wouldn't their skin show that as a result? We decided to do some research on that, and here is what we found.

Ganoderma translates to bright, shiny skin. Many people notice upon using our soap, no matter how their skin feels, it begins to feel more vibrant. **People who consume Ganoderma tend to notice a youthful glow, and improvement in self confidence.** Teenagers with pimples, people who have dry or oily skin, and many other things as well, notice that their skin feels incredible after using our soap. Some also use coconut oil and Ganoderma on their skin, or on sores, or inflamed skin areas and notice improvements as well. The grape seed oil, and toothpaste are also phenomenal for burns, insect bites or stings, and many things to do with skin.

In fact, here are a few stories of people who started using Ganoderma, and here are their stories.

'I had a rash appear last week, still don't know where I got it from. I opened the grape seed oil and put it on just before I went to bed. Immediately the itching stopped and felt some relief. 12 hours later it wasn't as red and a week later it's gone!'

- K.B.

'My wife Michelle Bailey has had sore and very dry skin for over 10 years. She has tried lots of different treatments (medical and natural) but nothing has ever worked until now....'

2 months of Organo Gold Spores supplements and it's almost gone! Absolutely amazing!'

- M.B.

'A couple of days ago I was visiting with my sister and her grandsons ages 4 and 5. The boys were on their playset when the oldest got stung on his arm by a bee. I'm sure most of you know how painful a bee sting is especially to a child. I immediately told her to put OG toothpaste on the bee sting and she did just that! As soon as she put the toothpaste on the sting her grandson went right back to playing as if nothing ever happened! And within a couple of hours you could not even tell he had been stung! Only a tiny spot where the stinger went in his arm. No swelling whatsoever! We also did the same thing with my 5 year old niece last year when she got bee stung too. Her results were the same!'

- S.G.

WHAT ABOUT THE SUCRALOSE IN XT?

Many of us in Organo are extremely health conscious and try to eat as close to perfect as possible, probably just like you. And we felt the exact same way that our products should have that same mission in mind as well. But after doing our research and laying out the pros and cons, here is what we found.

The positives of XT, containing 100% certified organic Ganoderma, Arginine, Rhodiola, Guarana, Mycelium, and inositol so far outweighs the imperfection of sucralose compared to other commercial competition, that it's almost like comparing organic vegetables to fast food. Although not perfect for the person who would like to eat perfectly,

XT provides a tremendous amount of clean energy support to the body, and provides more than enough buffering to detoxify anything negative from sucralose. We know when a person drinks this, they are getting a clean healthy drink with a smooth, boosted energy, and no hard crash at the end. We know this is benefitting us and those we care for most, and we know it will do the same for you too.

Here is a testimonial from someone who discovered what the benefits are from consuming XT:

'Before learning about the ingredients in the XT, I was always against the use of Sucralose and would advise my patients to eliminate it from their diets. Until I learned that in fact, the Sucralose in the Fenix XT did not have any significant negative effect on the product and body at all. Upon looking into this further I discovered that there has been more than enough Ganoderma added to the product to insure that it counterbalances all of the other ingredients leaving the addition of Sucralose as insignificant in terms of it's nutritional value.

Now I am more than confident advising my patients on the wonderful benefits of using the XT it's an absolute no brainer'.

- Dr. Bob Rakowski

WHAT ABOUT SUNBURN?

That's a great question, and we were curious as well. How does Ganoderma relate to sunburn? We decided to do some research and here is what we found.

Ganoderma actually protects the skin from the harmful rays of the sun. Many people consuming Ganoderma have gone years without a sunburn even in places like Hawaii where sun is much more intense.

In fact, here is a story from a person who shared their experience around Ganoderma and the topic of sunburn.

'I live in a part of the world that has some of the most intense days summer on the planet. With that intensity comes very powerful and bright sunlight. For my whole life I've always loved to be outdoors as much as I can, but at the expense of getting sunburns here and there. This hurt my skin and many times caused my skin to peel after it was burned. After I started using the Organo Products, drinking the beverages, taking the capsules as using the soap, I noticed my skin wasn't burning anymore. My skin now gets prettier and shinier with sunlight, instead of burned like it used to. I haven't had a sunburn in years'.

- J.R.

WHAT ABOUT THE TOOTHPASTE? WHAT ABOUT BAD BREATH? TEETH WHITENESS? WHAT ABOUT PAIN FROM BRACES? DOES THE COFFEE STAIN YOUR TEETH?

We had the exact same question. How is this toothpaste different, what can it do for breath and teeth whiteness? Is it possible people may have less pain with braces? Does the coffee stain your teeth like normal coffee? We did some research and here is what we found.

Ganoderma is antimicrobial, antifungal, reduces inflammation/bleeding gums, reduces plaque, and many people report when using OG toothpaste that when going to the dentist their hygienist says their teeth look like they were cleaned before they came in. One thing many also don't know is our coffee doesn't stain your teeth like normal coffee, so with our coffee and toothpaste, your teeth can be shining white and bright. Our toothpaste also doesn't contain a very harmful cancer causing chemical called fluoride, and our toothpaste is even safe to use on pets. People also notice they either have to take less trips or shorter trips to the dentist, and their teeth are whiter and cleaner. Those with braces notice that after their braces are tightened, when using OG toothpaste, the swelling, pain, discomfort goes down MUCH faster. It may even reduce the amount of time someone spends in their braces. In fact, here are a few stories of some people using Ganoderma who now have better breath, and who have less pain after getting their braces tightened.

'I just want to share a personal testimonial about one of my favorite products- OG TOOTHPASTE!!! When I used to whiten my teeth years ago with store-bought whitening strips, my teeth would hurt after just minutes of putting them on, and my gums would hurt even the day after, the pain was almost unbearable.

Since I started using OG toothpaste, my teeth and gums have been healthier than ever!!! This morning, I went to get my teeth professionally whitened before my wedding, and my dentist warned me that it would probably hurt and become extremely sensitive. To my surprise, I FELT NO PAIN AT ALL, even with having the gel on my teeth for 40 minutes!!! She was amazed at how healthy my teeth and gums were, and I was so happy that it was such a breeze! Thanks OG!!! Best products in the world!'

- C.R.

'I had a patient come in who had the worst breath I had ever smelt. She also had braces and really bad bleeding gums. I couldn't get too close to her but I recommended she try the OG Smile Toothpaste and asked her to brush her teeth with it 4 times per day. Well, after a short period of time all of her bad breath symptoms were gone and so were her bleeding gums.'

- Doctor, Texas

CAN I TAKE TOO MUCH OF THIS STUFF? TOO MANY COFFEES? TOO MUCH GANODERMA?

That's a great question, too much of a good thing is bad right? We decided to do some research on how much Ganoderma is too much, and here is what we found.

There is no known toxic level of Ganoderma. In fact, a scientific study was conducted and it was found that a 100 lb dog was given 4,000 doses of Ganoderma per day for 2 weeks. So that's 56,000 doses in 2 weeks. How many coffees or products should you consume? As many as you like or need! **Even the spores are okay to take lots of as long as you are consuming PLENTY of water.** In fact, on consuming large amounts of Ganoderma, you may experience that you are much more thirsty.

Some people consider this dry mouth or bad, but this is not bad. This is your body craving hydration. Give it the proper hydration it needs, so the Ganoderma can work within your body. You cannot take too much Ganoderma, just consume what you would normally consume, or more if you like.

In fact here's a story of someone who consumes OG Products religiously, and this is their experience.

'I honestly don't think there are many people out there who possibly consume more OG products than me! One time I did slow down a little as I was really worried I was consuming too much Ganoderma on a daily basis but all I noticed was a decrease in energy, focus and a less healthy appetite. Upon further research I found out even though they say too much of a good thing can be bad for you, it isn't the case when it comes to consuming Ganoderma! I found out that you simply cant have too much. I literally drink the OG beverages all day long aswell as my OGX shake and capsules and I have never felt as good as I do now. I never get sick or feel unwell and the energy I get from these products is incredible!'

- A.A.,UK

WHAT ABOUT WEIGHT LOSS WEIGHT MANAGEMENT?

WHAT ABOUT ELIMINATING TOXINS FROM THE BODY? DOES GANODERMA HELP WITH THESE THINGS?

We had the exact same question and decided to put it to the test, as well as do some research, and here is what we found.

Ganoderma is known to powerfully detox stubborn toxins in the body, increase natural energy, decrease inflammation which helps shed fat. Once a person reaches their desired weight, OGX is absolutely DELICIOUS, and a person continues to consume 1 shake per day at maintenance phase, while 2 shakes per day at weight loss phase. This makes the change enjoyable and sustainable. Because of the high nutrient value of the products, people are known to consume them and be fully satisfied, not hungry afterwards.

In fact, here are 2 stories, 1 of weight loss/weight management on latte, 1 on the shakes. The man shown below originally was consuming the products to prove to a friend that they didn't work. Well 8.5 months later he lost 100 pounds!

Here is one young lady from Tulsa, Oklahoma who drank 1 latte per day (containing sugar) and lost 57 lbs. over 10 months!

'Well this has been an amazing journey and it has only begun! I was once a size 44, now I'm a 34. I've lost over 90 lb in 8 1/2 months thanks to two OGX shakes a day, but what I'm most proud of isn't my weight, it's my mental state. I feel great physically and mentally. I'm able to sleep and cope with life a whole lot better, and I had a Lisfranc fracture on my right foot which I used to be scared of even jogging or running because of the pain, but today I couldn't even tell you which foot it was thanks to the power of Ganoderma!'

- F.Z.

WHAT ABOUT THE WHEY IN OGX?

I DON'T DO WELL WITH DAIRY. WHAT COULD GANODERMA DO FOR ME?

We totally understand how you feel, not wanting to experience discomfort in your body and consume something that you don't respond well to. Many of us who don't do well with whey felt the exact same way. But we knew the Ganoderma may possibly buffer some of the negative effects some of us had experienced with whey, and what we found was this.

Organo's products contain **100% Non GMO, Grass Fed Organic New Zealand Whey**. Most people who are dairy sensitive are consuming from a source FAR less clean. 7/10 people who don't do well with dairy/lactose sensitive, do just fine with our products. For those that try it and don't, we recommend taking 3 spores with your OG products to buffer for 1 week-1 month, and afterwards your challenges should go away. In fact, here is a person who used to have major challenges with whey and does just fine using OGX!

I have always been very sensitive to dairy and anything with whey used to leave me feeling unwell. I was very excited to hear about the OGX until I found out it had whey in it. Fortunately, I was at an Organo event with world renowned health expert Dr. Bob Rakowski when they were released and he encouraged me to try them because, as he explained, they are made from the most digestible form of whey available.

He explained it very scientifically in a way that he can do far better than I ever could)- and so I did. Needless to say I am so glad that I did and have been drinking them now consistently as they make such a delicious and quick meal replacement and do not bother my digestive system whatsoever. As a matter of fact I feel like my digestion has completely improved! And as a bonus I've lost that last 5 to 10 stubborn pounds that I never seem to be able to get rid of. I am so grateful for the OGX shakes and now my whole family enjoys them in different forms; shakes pancakes etc.. We even make brownies and cookies out of them! Our daughters are also lactose intolerant and they have found the same results our whole family enjoys them and I'm confident you will too!

- T.R.
